

Power-Operated Door Systems with Integrated Security

Hands-Free Access, ADA Compliance, and Controlled Entry for Healthcare, Commercial, and High-Security Facilities

130SYS Power Operated Doors with Locking Systems

Power-operated doors with integrated locking provide hands-free access, controlled security, and reliable performance in high-traffic or code-driven environments. They're used in healthcare areas like **ORs, ICUs**, clean rooms, and isolation wards; in commercial spaces such as **secured offices, banks, airports, and staff-only corridors**; and in **luxury residential buildings** for lobbies, package rooms, amenities, and restricted service areas where touch-free convenience and controlled entry are essential.

Key Advantages:

- Automatic access convenience
- Integrated electronic locking
- ADA accessibility
- Fail-safe or Fail-secure security design

Components:

- **100SW** Low-Energy Operator
- **600FSAFE** electric strike or **820** maglock
- **F241** key switch, **DX230** keypad or **HF308** wireless outside mount activation
- **552** power supply
- **F117 REX** request-to-exit-device

Used In:

Airports, Transportation hubs, Commercial and Office buildings, Luxury residential buildings, Banks, Government Buildings
