

01

Item #9100 - Mantrap/Sally Port

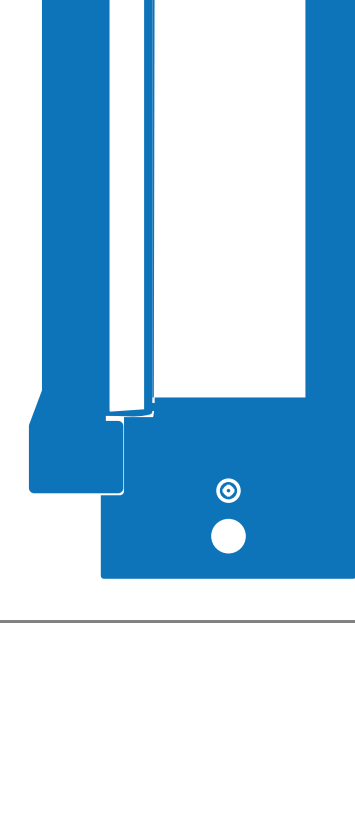

The mantrap system works with 2 doors and one room. The 2 doors(normally locked) will stay locked until the correct access key or proximity card is presented to the access control reader. This protects the following room from exposing any harmful microorganisms.

02

Item #182-15 - Door Positioning Switch

The unique housing design features a rugged unibody construction with flexible ribbed sides for quick, secure installation without gluing. The magnet housing isolates the magnet from the surrounding steel for maximum gap distances.

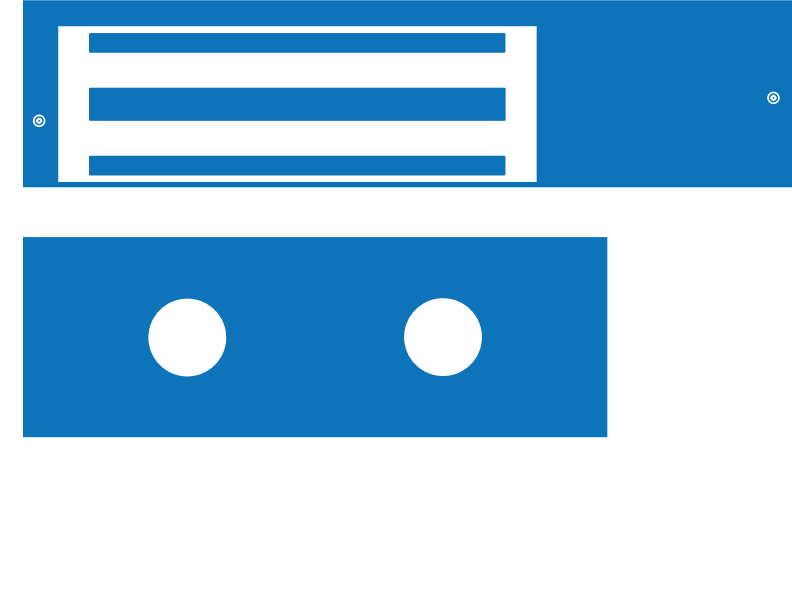

03a

Item #600 - Fail Secure Electric Strike

600 series electric strikes are universally adaptable to suit all door and frame types and accommodate most locking devices with up to a 3/4" latch protection.

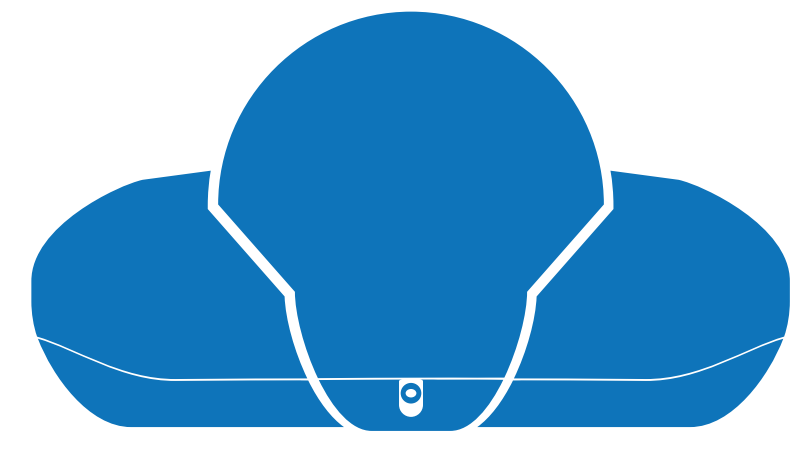

Verify proper locking hardware with the owner, owner's consultant and AHJ

03b

Item #825 - Electromagnetic Lock

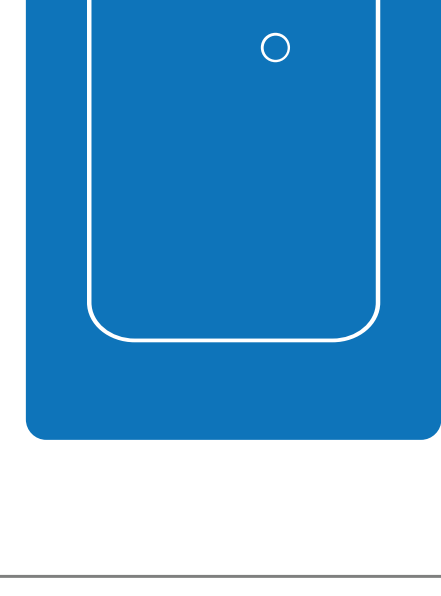

Electromagnetic Lock is comprised of 3 basic components: a lock housing, an electromagnetic coil, and an armature. The coil and housing assembly mounts rigidly to the door frame while the armature mounts to the door in a manner that allows it to pivot slightly to compensate for door irregularities.

04

Item #424 - Passive Rex Sensor

The Rex Sensor switch can be connected to other devices such as proximity and PIN readers, and electromagnetic locks, etc. The relay is triggered when an object enters the detection field, switching from N.C. to N.O. contact to open the door.

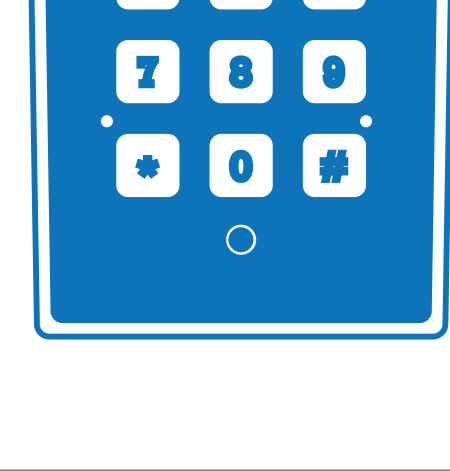

05a

Item #5395 - Auxiliary Card Reader

Providing performance and reliability, PCR's attractive, unobtrusive Proximity Card Reader is housed in a two-piece, weatherproof secure potted enclosure.

There is a choice between a card reader or digital keypad.

05b

Item #210-10 - Heavy Duty Digital Keypad

210 Series digital keypads provide a practical and reliable means of access to authorized personnel only into restricted or classified areas or after regular business hours. Convenient front panel programming.
