

# Access Control Digital Keypads

210-10

## Specification:

Operating Voltage: 12~24 VDC

Current Draw Holding: 40mA/ 12VDC ; 60mA/24VDC

Pull in: 70mA/ 12VDC ; 100mA/ 24VDC

Input: request-to-exit, door reed switch

Output: Dual relays, N.O. / N.C./ Com. Output (Dry contact)

Relay Rating: 3A/ 120VAC ; 3A/ 24VDC

Relay Strike Time: Relay 1 time delay settin code:\*30

Relay 2 setting code: \*31

Strike Time: 1~99 seconds

Strike mode: Access Timer or Latch

Memory Volume: 20+1 PINs

Relay 1 is controlled by user 01~20

Relay 2 is controlled by user \*21

Operating Temperature: -20°C~70°C

Master Code: Default value: 12345

Net Weight: 470g

Material: Aluminum alloy

## Features:

210 Series digital keypads provide a practical and reliable means of access to authorized personnel only into restricted or classified areas or after regular business hours. Convenient front panel programming.

- Allows up to 49+50 PIN
- Door read switch for anti-tailgating
- Fully programmable via keypad and master code
- Durable stainless steel housing with vandal resistant screws
- Can open 2 doors with different combinations
